Optional Features

- Online operation within a parking system
- Reading QR codes from mobile devices
- Communication with the parking operator via intercom
- Remote control with identification

Basic Components

- 5,7" LCD display
- Control unit
- Short-range RFID card reader

Optional Components

- Long-range UHF reader
- Two-line character display
- Intercom for connection with the parking operator
- Registered remote control

Technical Details

Material	Coated galvanized steel
Dimensions	282 x 274 x 1170 mm
Weight	30 kg
Protection Level	IP 54
Maximum Power Consumption	195 W (including 45 W for heating)
Operating Temperature (with climate kit)	-25°C to +50°C
Processing Capacity	Up to 600 vehicles per hour
Power Supply	230 V ⊘
